PROFESSIONAL SUMMARY

I am a 5th-semester Business Information Systems student at Petra Christian University, committed to continuous learning and personal development. I have a strong interest in coding and technology, with hands-on experience in React, Laravel, Python, MySQL, and JavaScript. Beyond technical skills, I enjoy exploring new fields and challenging myself to understand and master them. This curiosity drives me to stay adaptable and open-minded in both academic and professional settings. Throughout my studies, I have developed strong analytical skills, especially in structuring and optimizing data for efficiency and clarity. I enjoy transforming information into practical solutions that enhance workflows and decision-making processes. My academic projects and organizational experiences have strengthened my abilities in problem-solving, teamwork, and technical execution. I aim to build a career where I can integrate my coding expertise and analytical mindset to create impactful, technology-driven solutions.
